SUMMARY

Computer Science student (CGPA 7.9) who builds accessibility-focused applications using Python, Flask and AWS. Hackathon runner-up with hands-on experience deploying AI-based tools on the cloud. Seeking a software engineering internship / entry-level role to build practical, user-focused software.

EDUCATION

B.E. Computer Science – KGISL Institute of Technology, Coimbatore 2024 – Present
CGPA: 7.9 | Relevant coursework: Data Structures, DBMS, Operating Systems, Computer Networks

Higher Secondary (12th) – GSR Matric Higher Secondary School, Coimbatore 2023 – 2024
Percentage: 78%

Secondary (10th) – GSR Matric Higher Secondary School, Coimbatore 2021 – 2022
Percentage: 84%

EXPERIENCE

Cloud Computing Intern – NxtLogics 2026 (15 days)

- Built and deployed an AI-powered YouTube dubbing tool using Python and FastAPI that converts video speech into another language.
- Used Whisper for speech-to-text and NLLB-200 for translation, forming an end-to-end dubbing pipeline.
- Deployed the application on AWS EC2 and stored media files in AWS S3.

Full Stack Development Intern – DT Software Development and Research Pvt. Ltd.

PROJECTS

Indian Nagish – Assistive Communication App **GitHub**

- Built a real-time communication app for deaf and speech-impaired users that converts speech to text and text to speech, using Python, Google Speech-to-Text API, SpeechRecognition and gTTS.
- Added support for 11 Indian languages (including Tamil, Hindi, Telugu, Malayalam, Kannada and Bengali), widening access for regional-language users.

Mobility Assistance App for People with Disabilities **GitHub**

- Developed a location-based Flask web app that helps wheelchair users find accessible places such as ramps and elevators.
- Fetched accessibility data from the OpenStreetMap Overpass API and stored results in SQLite for quicker repeat lookups.

Employee Payslip Management System **GitHub**

- Built a payroll system in Java and MySQL with role-based access, giving HR and employees separate views and permissions.
- Automated salary calculation including tax deductions, PF and allowances, removing the need for manual computation.

TECHNICAL SKILLS

Languages: Python, Java, SQL, C, C++
Frameworks & APIs: Flask, FastAPI, Google Maps API, Overpass API, Google Speech-to-Text
Databases: MySQL, SQLite
Cloud & Tools: AWS (EC2, S3), Git, GitHub, VS Code, Linux
Core CS: Data Structures & Algorithms, DBMS, Operating Systems

SOFT SKILLS

Teamwork & Collaboration | Adaptability | Self-Learning

ACHIEVEMENTS

- Runner-Up, PyExpo Hackathon
- Participant, Smart India Hackathon 2025

CERTIFICATIONS

- Diploma in Computer Application

Languages: Tamil, English
